

## Yesterday's factories were steam powered – today's smart factories are mind powered

As machines become more interconnected, the power of the human mind in shaping these new digital environments responsibly and sustainably has never been more important. That is why TTTech Industrial is on hundreds of shop floors at once. If you come work with us in Vienna, so are you.

## DevOps Engineer – Industrial IoT (m/f/d)

Are you passionate about build systems and Industrial IoT? Then this role might be just the right fit. Together with a team of experts you will take over responsibility for managing, developing, and maintaining a reliable software infrastructure toolchain in order to facilitate our development processes and support our software developers.

### Your Tasks

- Development and design of the next generation of our build systems
- Operating the build systems for our edge computing platform locally and in the cloud
- Support of the migration of our cloud systems to Kubernetes
- Increase of development performance with automation tools and frameworks for continuous delivery
- Assistance in maintaining and provisioning of a state-of-the-art development tool chain
- Reduction of manual efforts by automating processes and workflows
- Investigation of technical issues and development of stable solutions

### Your Profile

- Technical degree with focus on software engineering (e.g. Computer Science)
- Profound understanding and support of the DevOps mindset in an agile and standard setup
- Experience in Linux administration ideally in the container environment (e.g. Docker, Kubernetes) and with various containerized build systems as well as scripting (e.g. Python, Bash)
- Experience with automation of workflows and CI/CD (e.g. Jenkins)
- Practical experience with infrastructure as code (e.g. Ansible, Terraform) and monitoring (e.g. Prometheus)
- Good technical understanding and analytical thinking skills
- Very good command of English

### Our Offer

- Exciting work environment – be part of future high-tech innovations and cutting-edge technologies
- We are a team – flat hierarchies, open door policy, communication at eye level and hands-on mentality
- Technical expertise – work among fellow experts and minds that will inspire you
- Central locations – our offices are located in the city center near Karlsplatz & Kettenbrückengasse, easily accessible via public transport and bicycle

- Benefits Package – lunch tickets, job tickets (unlimited use of public transport in Vienna or partially reimbursement of costs for KlimaTicket), numerous discounts, events and much more
- Work-life-balance – additional days off, home office, workcation (up to 45 workdays per year Mobile Working within the EU) and individual working time models

As of today, TTTech Group employs more than 2,300 people in 14 locations worldwide. Join our pioneering team and become part of our fascinating projects. You will find it #mindgrowing

We provide an attractive and performance-based salary, which is based on your qualifications and professional experience. This position is subject to the Collective Agreement for Employees in the Metal Trade (“Kollektivvertrag für Angestellte Metallgewerbe”) and we offer a minimum salary of € 49,000 gross per year. Actual compensation can be well above this standard.
